## INTRODUCING OASIS

Born from a new collaboration with globally renowned architectural firm, RAMSA (Robert A.M. Stern Architects), this contemporary sculptural hardware collection features natural, organic forms for doors and cabinetry. Timeless and sophisticated, Oasis is different than what may be anticipated from this partnership. Inspired by historic architectural references and the Arts and Crafts movement, the unique offering juxtaposes the structural quality of doors and millwork with the inventiveness and craftsmanship of jewelry, featuring design elements that are similar to gem cutting. The end result is a versatile collection that is both unexpected and delicate.
